Suggested Letter to Community Stakeholders

[insert date]

Dear

[Insert school name] School has the incredible opportunity to bring a Learn-To-Ride Bike Program to our Kindergarten PE classrooms, to get our students on two wheels!

[Insert school name] has [insert #] Kindergarten students this year. That means [insert #] kids will learn to ride a two-wheel bike this year alone, with the potential to reach [# of kid times 5] students in the next five years!

All Kids Bike Learn-To-Ride Program will be implemented into our school's annual PE curriculum. This integrative program introduces the life-changing skill of riding a bike within a structured classroom environment. Through a combination of a proven curriculum, 2-in-1 conversion bikes, and ongoing support, the All Kids Bike Program provides a simple and effective solution to help create a nation where all kids can ride a two-wheel bike, unassisted, in kindergarten.

This program has the potential to improve our community's health, academic achievement and so much more! [insert healthy data point from above page]

In order to implement this program in our school, we need support! The All Kids Bike Kindergarten PE Program costs \$5,000.00. For that price, our school would receive training and curriculum for PE teachers, a fleet of Strider 14x AKB-Specific Bikes, helmets, a Strider 20" teacher instruction bike, and ongoing support from All Kids Bike for 5 years.

We will have a series of fundraising efforts that our community can participate in. [insert upcoming fundraising activities and ways parents can help or get involved]

Thank you for supporting your community, and our school, to introduce kids to the health and happiness on two wheels!

For more information, contact [insert school contact person] or visit the Kindergarten PE Program website found here: <https://www.allkidsbike.org>

[insert school motto or cheer]

[insert principal name and title]
